DevOps Engineer (W/M/X)

Welcome at Yuzzu

Yuzzu is the insurance broker. As a new employee, we welcome you to a surprisingly smooth and dynamic working environment, where we always speak clear language and keep our promises. Without small print, and with a smile.

Would you like to invest your energy and talent in an insurance company in full growth? Then take a quick look at this vacancy and apply by sending your CV and motivation letter to recruitment@yuzzu.be!

Yuzzu is currently seeking a **DevOps Engineer**

Which are your most important targets?

▶ Yuzzu is constantly launching new projects and initiatives aiming to innovate, meet the expectations of clients and internal users, and prepare for the future by modernizing its IT/application landscape. With this in mind, several multidisciplinary teams are continuously working together with a cross-functional technical team on these projects, based on an "Agile/Scrum" approach.

Which are your responsibilities?

▶ As DevOps Engineer you will oversee the implementation and administration of various application hosting platforms with the support of AXA Group expert teams.
▶ You'll manage the automation of integration processes, of testing, of application deployment and all other settings of the available platforms.
▶ You'll collaborate closely with our other Agile teams, Business and Support teams on fixing incidents, problems which could occur on the application platforms.
▶ You'll guarantee the robustness of the platform based on defined recommendations.
▶ As team member of the Transversal Technical Team, actively supporting our internal and external customers, you'll have an active role when sharing your ideas and efforts to continuously improve the deliveries of the team and the deliveries of the company.
▶ You're enthusiastic about participating to our Cloudification journey.

What are your skills and experiences?

▶ You have a degree in computer science (bachelor's, master's, or equivalent)
▶ Setup and administration of Linux system (Debian, Ubuntu, RHEL)
▶ Scripting: Bash, PowerShell, Python, …
▶ Containerization and Infrastructure As Code: Docker, Kubernetes, Helm, Terraform
▶ Knowledge on Cloud Infrastructure and SaaS Services (AWS, Azure, Google Cloud, …)
▶ Monitoring and logging: basic knowledge of Kibana, Grafana, Prometheus, etc
▶ You are comfortable with containerization environments (Docker, OpenShift, Kubernetes, Helm, Skaffold, …) and infrastructure as code principles

- ► You have in-depth knowledge in at least one of the cloud environments (AWS, Azure, Google Cloud) and cloud service integration
- ► You are proficient in scripting languages such as Bash, PowerShell, Python, or others.
- ► You are familiar with setting up automation, deployments via CI/CD (Jenkins), as well as automation tools (such as Terraform, Puppet, ...)
- ► You are familiar with the needs of monitoring, logging, and traceability of platforms (using tools such as Kibana, Grafana, Prometheus, ...)
- ► You have some understanding of managing complex platforms

Assets

- ► Experience in creating and managing Cloud Resources
- ► Experience in creating and maintaining Pipeline (GitHub Actions, Jenkins)
- ► Experience in managing databases such as Oracle, MSSQL and PostgreSQL
- ► Experience in managing Java applications
- ► Participation on Open-Source projects

What's your profile?

- ► Flexibility is in your genes: managing changes and priorities is part of your daily routine
- ► You are interested in new technologies
- ► You have already worked in an Agile team
- ► You are focused on business needs and align your priorities with them
- ► As a DevOps Engineer, you have an analytical mind. Creativity and innovation are part of your qualities
- ► Thanks to your team spirit and communication skills, you maintain excellent relationships both internally and externally
- ► Dynamic and resourceful, open and curious, you work independently and proactively, and have a sense of responsibility
- ► You are inspired, passionate, and inspiring
- ► To work at Yuzzu, any experience in accident, fire, and risk insurance is an additional asset
- ► You are proficient in English and at least one of the two national languages (Dutch or French)

What do we offer?

- ► A competitive salary with extra-legal benefits
- ► A friendly and open working atmosphere in a pleasant environment
- ► A diverse and motivating role at the heart of our company
- ► Autonomy based on your skills
- ► A good work-life balance, thanks to hybrid working setup
- ► Ongoing training and support

Who is Yuzzu?

Yuzzu is an insurance broker and part of one of the largest financial groups in the world, the AXA Group. Every day, our 175 staff are on hand to guarantee a quality and personalised service for our 177,000 customers and our partners.

Yuzzu today remains a company that operates on a human scale. Both at our head office on the Troon site in Brussels and at our six shops spread across the country, there is a friendly and informal atmosphere that suits a growing company

Yuzzu attaches great importance to its staff and the quality of interpersonal relations. Because it takes a solid team to meet everyday challenges and translate them into effective and innovative solutions for our customers. Do you want to be part of our team? Apply now!
