

## Data Engineer (W/M/X)

### Welcome at Yuzzu

Yuzzu is the Belgian market leader in direct insurance. As a new employee, we welcome you to a surprisingly smooth and dynamic working environment, where we always speak clear language and keep our promises. Without small print, and with a smile.

Would you like to invest your energy and talent in an insurance company in full growth? Then take a quick look at this vacancy and apply by sending your CV and motivation letter to [recruitment@yuzzu.be](mailto:recruitment@yuzzu.be)!

Yuzzu is currently seeking a **Data Engineer**

### Which are your responsibilities?

As a **Data Engineer**, you will:

- ▶ Design, build, and maintain **ETL pipelines** to collect, transform, and load data from various sources (databases, REST APIs, flat files, etc.).
- ▶ Model and manage **relational and analytical databases**.
- ▶ Ensure the **quality, reliability, and performance** of data flows.
- ▶ Collaborate closely with Data Science, BI, and Product teams to meet business needs.
- ▶ Ad-hoc support for reporting activities within the Data & Reporting Team (**Power BI, Ad-hoc queries**)
- ▶ Automate and document data processing workflows.
- ▶ Contribute to defining and improving the company's overall **data architecture**.

### What are your skills and experiences?

Technical skills:

- ▶ Strong command of **SQL** and relational databases (PostgreSQL, Oracle, etc.).
- ▶ Solid experience in **Python development** for data processing and manipulation (pandas, SQL alchemy, etc.).
- ▶ Proven experience building and maintaining **ETL / ELT pipelines**.
- ▶ Experience working with **REST APIs** (data integration, consumption).
- ▶ Good understanding of data formats (JSON, CSV, Parquet, etc.).
- ▶ Experience with **Django** is a plus.
- ▶ Familiarity with **cloud environments (AWS)** is an advantage.

Soft skills:

- ▶ Strong collaboration and communication skills.
- ▶ Analytical mindset and attention to detail.
- ▶ Curiosity and eagerness to learn new technologies.

- ▶ Good knowledge in French/Dutch and with a minimal understanding of the other language. English is required.

### **What is your profile?**

- ▶ Degree in Computer Science, Data Engineering, or a related field (Bachelor's or Master's level);
- ▶ At least 3 years of professional experience in a similar role.
- ▶ Passionate about data, systems, and building efficient data solutions.

### **What do we offer?**

- ▶ A competitive salary with extra-legal benefits.
- ▶ A friendly and open working atmosphere in a pleasant environment.
- ▶ A diverse and motivating role at the heart of our company.
- ▶ Autonomy based on your skills.
- ▶ A good work-life balance, thanks to hybrid working setup.
- ▶ Ongoing training and support.

### **Who is Yuzzu?**

Yuzzu is an insurance broker and part of one of the largest financial groups in the world, the AXA Group. Every day, our 175 staff are on hand to guarantee a quality and personalised service for our 177,000 customers and our partners.

Yuzzu today remains a company that operates on a human scale. Both at our head office on the Troon site in Brussels and at our six shops spread across the country, there is a friendly and informal atmosphere that suits a growing company

Yuzzu attaches great importance to its staff and the quality of interpersonal relations. Because it takes a solid team to meet everyday challenges and translate them into effective and innovative solutions for our customers. Do you want to be part of our team? Apply now!
